- Experience with Mavenscriptsfor building and deploying the application in web/app servers.
- Hands-on experience in Restful Services.
- Strong debugging and troubleshooting skills.
- Have good experience in writing Oracle SQL Queries.
- Experience in Oracle JDeveloper, Eclipse, and Developer.
- PLSQL query knowledge and HQL query language
- Involved in Client and Serverside development

Technologies:

Languages	Java8, PLSQL
Framework	Spring MVC, Spring Boot, Microservices, REST
Tools	Oracle JDeveloper. Eclipse, SQL developer, Postman
Architecture	Monolithic, Microservices
Databases	Oracle 19c
Build Tool	Maven
Servers	WebLogic, Tomcat
Operating Systems	Unix, windows
Version control system	GIT (BITBUCKET)

Education:

- Completed Bachelor of Technology (EEE) from JNTU in 2015

Experience:

- Working as an Analyst Development in Standard Chartered GBS Chennai from May 2022 to till date
- Worked as a Software Developer in Bizdom Technologies Pvt Ltd Bangalore from Oct 2018 to April 29, 2022.

Projects:

Project# 3#

Transaction Workflow on Channels – DFT (RCP) (May 2022 to Till date)	
Role	Analyst Development
Client	Standard Chartered Banking
Platform:	Java, Spring Boot, Spring MVC, Spring JPA, Oracle 19c SQL & PL SQL, WebLogic, Postman, Eclipse, SQL Developer, GIT, Application Channels Functional & High-level Development & Testing.
Project description	<p>A payment gateway is a microservice application that integrates with third-party payment channels. This application also validates Beneficiary details before the payment.</p> <p>Testing Workflow analysis Applications and Channels End to End.</p> <p>Check the Channels step involved on DB scripts and initiate transaction response step flow linear and final step.</p> <p>Infra team leads support application build and trigger on testing environment flow.</p> <p>Working on Repository more functional and pull, Push commit end to end. Below are Key activities look and lead on infra and prod team a lead network to support end-to-end Payment DB scripts, category, Rulesheet, XLS, and XSL files for check response and Functional conditions.</p> <p>Application -UI Regression test for a check on impact if any before the user interface to fix them on Channels and workflow delivery.</p> <p>Application server logs error fix on development team on initial phase – Putty and find the root cause and report internal, Email coordinate with multiple squads.</p> <p>Business analyst assigned work on Jira ticket ID and update same as per acceptance criteria.</p> <p>Server log check on Jboss</p> <p>Jenkins build and deployment of new build changes and manages end to end Team Work.</p> <p>Involved in multiple CI/CD meetings.</p> <p>Work is a round clock segmented approach Application sanity check and TRXN health – stages of implementation.</p> <p>Internal workflow changes take and great step on the functional web applications on good impact revenue</p> <p>Key activities:</p> <ul style="list-style-type: none">✚ Involved in client meetings for business requirement gatherings.✚ Developed several REST web services supporting both XML and JSON✚ Developed a Restful service to provide all the CRUD capabilities.✚ Implemented Spring Rest Controllers.✚ Written Microservices API to interact with other Microservices.✚ Involved in GIT for the release process.✚ Involved in Coding and debugging.✚ Unit Testing with Postman.
